Peters CARTRIDGES

SUPER-ACCURACY

AND

Peters
Cartridges

Get the **P** Brand

.45 AUTO-RIM

Adapted to 1917 Model Colt and S. & W. Revolvers which have been chambered for the .45 A.C.P. Cartridges when used with clips. With Peters .45 Auto-Rim cartridge no clips are necessary.

Distinctly a Peters improvement this cartridge is characteristic of the advanced construction to be found in the **P** brand shells and cartridges. You can now forget about clips and use this cartridge like any other revolver cartridge—the rim insures perfect ejection. With the exception of the rim advantage this cartridge is the same throughout as the .45 A.C.P.

The **P** Brand offers ammunition advantages.

Peters cartridges are produced with the idea that unless they are the best that human ingenuity can produce, they are of little value to anyone, except the youthful tin-can shot. Super-accuracy is not a characteristic of one type of Peters cartridges; it is the dominant feature of the entire field of Peters Ammunition.

When you think of more accurate cartridges, think of the **P** brand. This ammunition is produced by an organization which has for more than a third of a century devoted its entire effort to the production of ammunition and to devising means whereby more accuracy and uniformity could be attained. The Peters Cartridge Company is in short a group of ammunition specialists—result: Better ammunition—super-accuracy in every cartridge.

UPON the Ohio State Range at Camp Perry, where, according to wind and weather, the targets loom boldly against their background of Lake Erie blue or melt into the mists of drab lakeside moorings, there has been written much of rifle shooting history and tradition. Along the firing line which edges the unbroken expanse of range, riflemen have risen overnight to fame, and in the swift flight of a single off-pulled bullet have gone down to defeat. There records have been made and records have been broken. Yet it is doubtful whether the oldest of the shooting clan, sifting through their recollections of the past, can conjure up memories of any single meeting wherein more phenomenal scores were made than during the N. R. A. Matches of 1920.

It has been a splendid meeting; a shooting match which delighted the hearts of the thousand and more marksmen on the grounds. That hardy perennial—the man who kicks about his tent and his grub—was somehow conspicuous only through the fact that he was hard to find. The camp was clean and sanitary and pleasant. Never before was it better arranged to accommodate the big marksmanship contests of the Nation. The weather was little short of ideal. Heavy storms, it is true, twice swept over the range during the course of the N. R. A. Matches, but they were of short duration and interfered little with the competitions.

Yet a shooting camp, no matter how well conducted and no matter how comfortable, fails in the estimation of riflemen unless it sees the passing of old records and the making of new. So even better than the fact that the matches were staged without hitch or hindrance, and to round out the satisfaction which all riflemen feel in a well-conducted, smoothly-run firing line, came the final and crowning glory of this shooting season. Scores which have stood

for years as the acme of accuracy were shamed before the straight shooting this year at Perry, and, if that were not enough, The Wimbledon was won by that total hitherto regarded as almost impossible of achievement—a Possible Score.

There were many high lights and hardly a dull event in this year's National Rifle Association Matches. Beginning with the Catrow Cup classic in the Ohio State Rifle Association program, the scores were largely record-breakers from the start. In that event, the victor ran a perfect score of 105 plus 14 additional bull's-eyes at 1,000 yards. Next, in the Members' Match, the winner made his perfect score at 600 and ran 9 additional bull's-eyes. Third, in the historic Leech Cup Match, a perfect score of 105 plus 11 bull's-eyes took first honors.

Up to this point, while records had been hard pressed and excellent shooting was apparent throughout the lists, no precedent had been smashed to the glory of the newer generations.

Then came the Adjutant General's Match, in which the winner ran a perfect score at 900 and 1,000 yards, and continued shooting to a tune of 21 additional 5's, to beat perfect scores with 4 and with 3 additional bull's-eyes.

At last a record smasher of 31 bull's-eyes in open competition at the long range! With the posting of the score the old-timers began to search their recollections. Certainly there had been long runs before at this range. They recalled that C. B. Winder had run twenty-seven 5's in the Buck-Eye Match of the Ohio program and that Major C. L. Sturtevant, of the Cavalry, had won the Leech in 1910 with twenty-four consecutive 5's. But thirty-one bull's-eyes, all admitted, set a new record.

Then the greatest surprise—the Wimbledon with a perfect score—the goal toward which long-range riflemen have

nolds, of the Coast Artillery. Behind them were a dozen or more good shots, with only one down from possible scores, so that it was evident that the long range would tell the story.

The shooting at 1,000 yards began in a gray light which would have made for high scores, except that a haze at the targets made definition poor. This condition naturally put a premium on telescope sights.

Hession went to the firing line about 9:30. He took with him a rifle which he had shot on the 1912 Palma Team and which, since that year, had been hanging in the trophy room of the New York Athletic Club alongside of a rifle used by that prince of by-gone riflemen, Gilder-sleeve, in one of the early international matches. When Hession found that none of his present rifles suited him, he borrowed the rifle from the club and brought it with him to Camp Perry.

Beginning to shoot his score, Hession found that $1\frac{1}{4}$ points of right wind gave him all the correction needed, and his "glass eye" overcame the poor definition at the target. At the same time, the users of iron sights found that they were badly handicapped; the men who preceded Hession—both of them good shots—made relatively poor scores.

Hession got into the black with his first sighting shot, stayed in with his second and ran off seven fives. Then he began shooting for record, and to cinch his hold on the match. Shot after shot he fired, each one finding the sable spot a quarter of a mile distant, until he had to his credit fourteen additional bulls. Of the other men who went up with perfect scores, Briggs, Walker, Crawley, Simmons and Weir dropped one point on the long range; Whitaker dropper two, while Stokes, Wilson, Tupper and Reynolds dropped three each. In between Briggs and second place there edged six competitors who had dropped a point either at 800 or 900 yards, but who were able to keep at least ten shots in the black on the long range.

An interesting phase of Hession's shooting in this match lies in the fact that the first sighting shot which he fired at 800 yards in the primary stage was a 4; all other shots, including sighting shots, were bull's-eyes. In connection with this, it will be seen that Hession ran forty consecutive 5's at the different ranges during this match.

This performance, although most unusual under the conditions, did not constitute a record at 1,000 yards which would seriously disturb existing records. But Hession was to be heard from again.

GOVERNOR'S DAY, Thursday, August 12, the date on which the Governor's Cup Match was fired, was a gala day in camp. The presence of Governor Cox, Democratic candidate for the Presidency, and a special program, including an air circus by the army fliers on the ground, were among the attractions which drew a large gallery from the surrounding centres.

The Governor's Cup Match,

"Glass Eye" John Hession, Who Lowered the 1,000-Yard Record and Won the Catrow and Adjutant General's Matches.

at 200, 600 and 1,000 yards, began in the early morning under shooting conditions which gave little concern to the marksmen, with the result that the scores made at the first two stages were uniformly so good as to leave the result of the match in absolute uncertainty until the last man had fired.

Governor Cox arrived in camp shortly before 4 o'clock, escorted by the Executive Officer, for the purpose of presenting to the winner the Governor's Cup. At the time of his arrival, the match was still in progress, the later relays on the 1,000-yard range being up. While the last of the shooting was in progress, the Governor inspected the range, returning later to the speakers' stand, which had been erected near the 200-yard range.

In order that all delay possible might be avoided, the statistical office got the scores well in hand early, and added on the totals at the long range as they came in. This situation gave rise to even more uncertainty than the close scores at the preliminary ranges had done, and during the last thirty minutes of shooting the line-up of leaders in the event changed rapidly. By 4 o'clock, however, it was considered almost certain that Lieutenant C. C. Simmons, U. S. M. C., would win the match. Simmons had gone to the long range with a perfect score at 200 yards and one point down at 600 yards, and had put on a possible at 1,000 yards, giving him a total of 149 out of 150. But at 4:15 Captain C. J. Amburgh, of the Small-Arms Firing School, went to the firing point. To his credit already stood a score of 49 at rapid fire and a perfect score at 600 yards. With $1\frac{1}{4}$ to $1\frac{3}{4}$ points of wind, Van Amburgh kept well into the black, from 3 o'clock to 9 o'clock, for his ten long-range shots, and when he finished shooting his total had tied that of Lieutenant Simmons. Examination of the scores then disclosed the fact that Captain Van Amburgh outranked Lieutenant Simmons by virtue of having dropped his point at the shorter range; accordingly the match was awarded to him.

In the presence of a gallery numbering well into the thousands, Governor Cox awarded the Gover-

Lieut. L. A. Yancey, U. S. N., the Wimbledon Winner.

Lieut. M. Fody, U. S. A., Winner of the President's Match.

Capt. C. J. Van Amburgh, Winner of the Governor's Cup.

1911, and the same year won the New England Aggregate. On the day when Lieutenant Perry S. Schofield made his phenomenal run in the McLean Match, Van Amburgh, shooting before him, made a run of fifty-three bull's-eyes at 500 yards. This was a record, but one destined to be short-lived, for Schofield, an hour later, cracked out 114 bull's-eyes at the same range.

HESSION'S run in the Catrow Cup Match was the starter for more long record runs, and the Leech Cup winner this year took his honors not only on a perfect score, but added eleven additional bull's-eyes to make his claim secure.

This year's struggle for the trophy presented in the dim days of past rifle shooting history by Maj. Arthur Blennerhasset Leech, a member of the first British International Rifle Team, attracted an unusually large number of entries. The first two stages of the competition—those at 800 and 900 yards—were fired early on the morning of August 13. The preliminary shooting, through the time of the first few relays, was done under fairly steady conditions of wind and light, but at 9 o'clock the wind was coming at a puffy 12- to 15-mile-an-hour rate from the right. A heavy mirage ran in front of the targets. In spite of these later conditions, many of the competitors made excellent scores, Sergeant Crawley, U. S. M. C.; Lieutenant Tupper and Sergeant Vereer, of the Infantry; Captain Loos, of the Small-Arms Firing School; Corporal Petroskey and Sergeant McGuire, of the Marine, and several others hanging up possible scores at the first two ranges.

The final stage of the Leech opened with little wind, but the light was so dim that the first relays had difficulty with poor definition. Among the first up was Crawley. The light bothered him on his sighting shots, but, getting into the black, he knocked out his seven-shot possible and continued shooting. Eleven times more the white marker showed beside his target before he fell out. Tupper and Vereer were the only others who

were able to keep up the pace they had set during the first two stages, and each put over a possible, Tupper's outranking that of Vereer. Crawley, the winner of the coveted Leech, is not a newcomer in the shooting game. His first winning on the National Match Range was at Jacksonville in 1915, when he captured the Southern Rifle Association's Long-Range Match and a gold medal in the National Individual. Crawley showed again at Caldwell last year, when he took first place in the National Individual.

"I am told," he said, "that of foreign-born soldiers who were taken into the United States Army during the World War, 75 per cent did not know where to find the trigger on an army rifle. This was emphatically not the case with American-born soldiers.

"The Governor's Cup, one of the trophies of the Ohio State Rifle Association, and competed for in this instance under the auspices of the National Rifle Association of America, is significant of the interest that this State has always taken in the development of marksmen.

"Captain Van Amburgh, in presenting to you this trophy, I congratulate you upon being the possessor of a keen eye and a steady nerve."

The winner of the Governor's Cup has been in the shooting game since 1904 and has attended many previous National Matches as a member of the Massachusetts team. He won the Tanner Match, which then followed the National Match course, at Wakefield in

WHEN the shooting opened in the Adjutant-General's Cup Match on August 13, Hession, of the New York Athletic Club, with the fruits of his Catrow Cup victory still fresh, took down his old "glass eye" fusee and ambled down to the 900-yard range. The sensational score hung up in the Catrow had whetted the appetites of a good many 'scope users, so that Hession was by no means assured of a walk-away. Against him appeared some shots who were well versed in the art of jockeying a finicky 'scope. Nor were iron sights to be entirely excluded from the equation.

The first stage of the match resulted, as did the early stages of the Leech, in several possibles, captain E. C. Crossman and Captain G. L. Wotkyns, of the Small-Arms Firing School; Sergeant Vereer, of the Infantry, as well as Hession, dropping no points over the 900-yard range.

The final stage of the match was shot during the afternoon of August 14, and Captain Crossman hung up a possible to go beside his perfect score at 900 and put on four additional bull's-eyes for good measure. Sergeant Vereer duplicated Captain Crossman's performance, save that he was outranked, and Captain Wotkyns came across with a possible score and three additional bull's-eyes.

Hession went to the peg about 2:15 o'clock. He found a 15-mile wind coming across from 2 o'clock and got into the bull on his second sighting shot with $1\frac{3}{4}$ points of windage. His first six shots were dead in the center of the target, and then a lull in the wind let his seventh shot flop over to the edge of the black at 3 o'clock. Eighth, ninth and tenth, his shots went home, pinwheeling the bull, and he continued to fire. Eleventh, twelfth, thirteenth, fourteenth and fifteenth, he sent them across for a beautiful group, and then the audience of riflemen who had gathered to watch the shooting were astounded to hear a green range officer—one who had been drafted from a State team and who had had no previous experience with long-range runs—turn to a competitor waiting his turn at the target where Hession was shooting, and announce:

"Y' might just as well go away from here. That there man's holdin' up the whole match and gummin' the game."

And Hession continued to "hold up the match" until he had put in six more bulls almost dead center. Then on his thirty-second shot at 1,000 yards he went out for a four, which was less than half an inch beyond the five ring.

(Continued on page 14)

Marine Gunner John J. Andrews, Winner of the Marine Corps Cup.

Dewar Trophy Remains in United States

By KENDRICK SCOFIELD

PRECISION and accuracy in the teeth of weather conditions which might have been expected to play havoc with .22-calibre bullets, piled up a winning score and kept the Dewar Trophy in the United States when twenty American marksmen successfully defended the International Small-bore Championship title at Camp Perry August 22.

The American total was 7,649 points. Great Britain's score, recorded as the result of shooting done several weeks ago, but made public only after the score of the United States team was completed, was 7,565 points.

The Dewar Trophy Match—teams of twenty shooters representing each country, twenty shots per man, at 50 yards and at 100 yards—came as the climax of the outdoor small-bore shooting season at the National Matches. For the past three weeks a hundred and more devotees of .22-calibre shooting have been busy on the miniature range. Following the precedent established in 1919, the Small-Bore National Individual Match, in which the course of fire is similar to that in the international event, was chosen as the criterion by which to select the men who would try out for the Dewar team.

The high forty men in the Small-Bore Individual gathered on the range Saturday afternoon, August 21, and there, as an elimination test, fired the Dewar course, the twenty top scores in this competition being selected as shooting members to compete with England.

During the try-out, gusts of wind, bursts of rain, darkness giving way to sunshine, combined to the confusion of the contestants; but it might have been worse, as the following day evidenced. Nevertheless high scores were made by many of the candidates for team honors, the high man being L. M. Felt, who shot in gathering darkness while a head wind was blowing, and hung up a score of 392 out of 400. In this string was a possible score at 100 yards. Scores of 380 made the team.

From the try-out scores, these team members were selected by Captain E. C. Crossman, who headed the American marksmen: L. M. Felt, Illinois; W. H. Richard, Connecticut; Captain G. L. Wotkyns, U. S. A.; A. H. Madsen, Camp Kearney, R. O. T. C.; L. J. Corsa, New York City; R. C. Stokes, Washington, D. C.; L. E. Wilson, Arizona; J. E. Miller, Ohio; A. C. Bork, Ohio; Lieutenant C. M. Brown, U. S. A.; T. H. Rider, Washington, D. C.; R. W. Ballard, Iowa; P. E. Littlehale, Connecticut; W. R. Stokes, Washington, D. C.; C. H. Johnson, Philadelphia; R. P. Hoffman, Culver, R. O. T. C.; D. W. Price, Iowa; P. A. Sheppard, R. O. T. C.; R. M. Morris, Washington, D. C.; Sergeant A. G. Hess, U. S. A. Alternates: Mrs. E. C. Crossman, California; J. F. Rivers, Connecticut; J. E. Bryson, Florida; F. W. Croneis, Ohio; R. E. Wolf, R. O. T. C.

Record shooting in the match against England began shortly after 9 o'clock August 22. When the team gathered on the range, the shooting members found their work cut out for them. If the weather during the try-out had been bad, what awaited them was certainly worse. The light was none too good. The morning was unusually cold. The wind, even more tricky than that of the night before, was slapping them in the teeth from 12 o'clock. Practice strings fired before record shooting showed that while normal elevations held well in spite of the 25-mile head wind, holding against the force of the gusty air currents was extremely difficult.

Some of the best shooters on the team were drafted into the first relay as pacemakers for the rest. Richard, Wilson, Wotkyns, Madsen, Corsa, Stokes and Felt went to the targets for the 50-yard stage. Before long they learned that to add to other troubles, the wind had a chilling propensity that stiffened the muscles of trigger fingers. But they started in doping, and the first set of targets showed one possible, one score of 99, and a low score of 95, with the rest stringing along on 96 or 97—a relay total of 679 out of 700.

The second relay at 50 yards—Miller, Bork, Brown, Rider, Ballard, Littlehale and Stokes—got two possible scores and two of 99 among others—a relay total of 685.

The third relay—Johnson, Hoffman, Price, Sheppard, Morris and Hess—scored 569 out of 600. At this point in the shooting the American team total for the first half of the 50-yard stage was 1,933 points out of 2,000.

The shooting of the first half of the 50-yard stage saw some changes in weather conditions. The second relay found it slightly warmer, with better light, but the changing light caused some lower scores than might otherwise have been expected.

In the second stage of the 50-yard shooting, the first relay dropped 2 points off its previous record, scoring 677 points. The

The United States Team, Winner of the Dewar Trophy. The total made by this team over the "try-out" was 7,612, which was better than the record score shot by the English.

second relay likewise put up a lower score—678 points—and the third relay was off 10 points when the scores were counted up, having recorded only 559 points.

This gave a total in the second half of the 50-yard shooting of 1,914 points out of 2,000. With the match half over, the American total for the entire 50-yard stage was 3,847 points out of 4,000. This showed 153 points down, and a comparison with last year's standing at this point in the match revealed the fact that at this point in the shooting last year the team was down only 151 points. This, however, was not regarded as discouraging. The conditions of this year's shooting were so infinitely worse than those of last year that this small difference was accepted as an indication that the team was shooting up to a higher standard than in 1919, and an examination of the scores developed that an individual average of 96.17 had been maintained.

While the third relay was finishing at 50 yards, the first relay was on at 100 yards. Changes of light were still frequent, and the 12 o'clock wind began to fishtail disconcertingly. In this relay R. C. Stokes put up what through the telescope appeared to be a possible, but examination of his target showed one shot just outside of the line. The other scores ranged from 93 to 96, with a total value of 665 out of 700.

ARMS AND THE MAN

1111 WOODWARD BUILDING, WASHINGTON, D. C.
SEMI-MONTHLY—ON THE 1st AND 15th DAY

Editor

BRIG.-GEN. FRED H. PHILLIPS, JR., Secretary N. R. A.

Associate Editor

KENDRICK SCOFIELD

Entered as second-class matter, April 1, 1908, at the post-office at Washington, D. C., under the Act of Congress of March 3, 1879.

That a man shall serve his country in time of war is noble, brave and patriotic; but that a man shall properly prepare himself in time of peace to serve in war is all of these things and more. It is noble with a nobility which is real, not ideal. It is brave with a bravery which assumes in time of unemotional peace many burdens, among them that of bearing the lack of appreciation of those who do not consider military preparation or training necessary.

ORDNANCE OFFICERS AND THE NATIONAL MATCHES

A RATHER unusual sight was to be seen at this year's National Matches; the two Ordnance Officers detailed to look after the needs of shooters during the competition themselves shot in all of the big events. Prior to the starting of the competition program each of these officers overlooked no opportunity to be with the shooters at their training, and throughout the match season have endeavored in every way possible to gain an insight into the rifleman's viewpoint.

To those who are unfamiliar with the attitude of Ordnance Officers in previous National Matches, there may seem nothing in this situation worthy of comment; to those who realize that the future of marksmanship in this country and the future development of small-arms for our fighting forces may be very beneficially affected by co-operation between Ordnance experts and practical marksmen, the circumstance takes a very different complexion.

The two Ordnance Officers detailed at the National Matches are Captain Julian S. Hatcher and Captain Glen P. Wilhelm. Captain Hatcher is stationed at Springfield Armory as one of the staff, where he is concerned mainly with the problems of small-arms manufacture. Captain Wilhelm's home station is the Infantry School of Arms, Camp Benning, Ga., where he is engaged in experimental and research work also in connection with small-arms. Each of these officers is recognized as an authority in his particular line.

Captain Hatcher was the Ordnance Officer for the National Matches of 1919. While at Caldwell, where Captain Wilhelm also came as an observer, each of these officers realized that a closer acquaintance with civilian and service riflemen might prove mutually beneficial. As the result of their study of the situation, begun at Caldwell, they were able to do a great deal in preparation for the National Matches of 1920 which resulted in better rifles and better ammunition for the National Matches. Not content with relying even upon first-hand observation, both of these offi-

cers determined to enter and shoot through the National Matches in order to get, in so far as is possible, the attitude of the practical shot.

We may confidently expect, as the direct result of the course adopted by the Ordnance Department with respect to the 1920 National Matches, developments in the small-arms and ammunition field along many lines. Among other things, the telescope sight question may now get thorough consideration, as well as the question of making available small-bore miniatures of the service weapons, both rifles and pistols. Already the shooters of the country are indebted to Captain Hatcher for the interest he has taken in seeing that the rifles for the National Matches were the best that could be produced.

There is also another Ordnance Officer who, while not present at Camp Perry, had much to do with the high quality of ammunition supplied to the contestants this year. He is Captain Wallace L. Clay, formerly of Frankfort Arsenal. Captain Clay is one of the few men in the Army who thoroughly understand the many complex phases of ammunition manufacture. Captain Clay was recently transferred to Dayton, Ohio, in charge of aircraft armament. It is unfortunate that this transfer was necessary just at the time Captain Clay was proving of such great value in connection with the manufacture of our ammunition supply.

The shooters of the country appreciate the fortuitous circumstances which led to the detailing of two such men as Captain Hatcher and Captain Wilhelm to the National Matches.

THE NATIONAL MATCH SCORES

THE HIGH standard of marksmanship evident in the scores made during the N. R. A. Matches at Camp Perry cannot but be gratifying to every believer in the national value of straight shooting. The scores in the National Matches and in those which precede the big competitions have always been high, but this year records have been broken and a new standard of accuracy set which will not soon be forgotten.

There are many causes which can be considered as directly contributing to this. First, both rifles and ammunition are far superior to those of previous years. Second, the system followed in picking most of the National Match teams—that of elimination shoots—is a good guarantee that the team members will be skilled shots and not designated arbitrarily by State officials as has sometimes been done in the past. Third, the shooting game as a sport is becoming recognized in all parts of the Nation; the organization of rifle clubs is spreading to the most remote corners of the most isolated communities.

The marksmanship records established during the National Matches of 1920 will undoubtedly be broken, but to set them aside will call for no mean degree of skill on the part of the shots of the future. This year's records should be, and will be, an incentive in the development of skilled shots to our ultimate glory as the premier Nation of riflemen.

The second relay at 100 yards found the wind had fallen to about 10 miles, and frequently puffing up to 15. Under these improved conditions, the second relay bettered the score of the first by 3 points, while the third relay added 569 points.

With the match three-quarters through, the American total was 5,749 points out of 6,000, an individual average of 287.45 points out of 300, or 95.81 per cent. This showed that the standard of shooting was being well maintained in spite of the greater difficulties at the longer range.

Near noon, the final stage—the last half of the 100-yard shooting—was under way. For a few minutes the wind switched to 9 o'clock, rapidly shifting back to 12 and fishtailing merrily, as before. The first relay found its work cut out for it, and stood on a count of 665 points. The second relay bettered its previous score, and came across with 669 points, while the third relay added 566 of the 600 points remaining.

As rapidly as the targets were shot they were taken to the range house and checked by Captain E. Newitt, representing the Society of Miniature Rifle Clubs of England, and the representatives of the American team. As soon as the final target was scored Captain Newitt announced that the American total was 7,649 points and the British total 7,565 points, a difference in favor of the United States of 84 points.

In announcing the totals to the United States team, Captain Newitt said:

"I now find myself congratulating the American team upon another victory in the International Match. I have noticed from the scores that both teams have very strongly increased their scores over those of last year, and, peculiarly enough, the improvement in scores was about equal. Last year the American team won by 94 points. This year the difference is 84 points, but when a keyhole shot fired by one member of the United States team at 50 yards is taken into consideration, that accounts for the 10-point difference."

The assembled shooters cheered Captain Newitt, both for his services at the small-bore range as statistical officer, and as the representative of the English team at the small-bore international.

Word from England has been received which shows that the Dewar Match of 1919 was shot by the British under conditions very similar to those which attended the shooting here. A changeable wind, from Southeast to West, was blowing, and light was none too good. The scores in the International Small-Bore Team Match are:

INTERNATIONAL SMALL-BORE TEAM MATCH.
THE UNITED STATES vs. GREAT BRITAIN.

For the Lord Dewar Trophy.

Conditions: Teams of 20 men per side, 20 shots at 50 yards, 20 shots at 100 yards per man. Possible score 400. Possible team score 800.

Team Captain—Captain E. C. Crossman, U. S. A.
Team Coach—Captain D. A. Preussner, U. S. R.

MATCH RIFLES, SUPERIOR ARMS

Camp Perry, Ohio, August 20.

(Special Correspondence to *Arms and the Man*.)

SEVERAL hundred riflemen will take home with them from Camp Perry rifles that for military weapons will be hard to equal. Accurate beyond all usual standards, made practically without tolerances, closely chambered, and carefully stocked, many of these rifles are no doubt destined to become the especial pets of their owners.

How these rifles came into being and how the ammunition for them was developed is a story which should directly appeal to all lovers of firearms. It is a story of the realization of a rifleman's ideal—a military weapon turned out to be as nearly perfect as possible. It is the story of how great a help ordnance officers can be to the shooting game when they sympathize with the wishes and the desires of civilian and service marksmen for military arms which are capable of super-accurate shooting.

The story properly starts at Caldwell last year when Captain Hatcher and Captain Wilhelm, the Ordnance officers of this year's matches, determined that if they ever again were called upon to serve in similar capacities, they would do all that they could to see that competitors were supplied with weapons about which there could be no complaint. Therefore, when the Ordnance Department was authorized to select special rifles for the National Matches of 1920, the officers concerned knew from past experience what civilian riflemen wanted and set about to supply it.

The National Match Springfield of this year's vintage does not superficially appear very different from those of previous years, except that the stocks are of uniformly straight grain and very dark—almost black. But a star-gauge pushed down the throats of any of them will disclose a mechanical perfection well above the average, while the smooth bolt-throw will delight the heart of any rapid-fire artist. It is true that the close chambering makes loading a bit hard in rapid fire, but that is a feature which will be approved in more cases than criticized.

When Springfield Armory undertook the manufacture of the National Match rifles, they accepted for this lot only barrels which star-gauged within half a thousandth of an inch of the minimum diameter, and in addition, if the bore varied along its entire length as much as one ten-thousandth of an inch, it was rejected.

The receivers were then hand picked. Each receiver accepted, together with the bolts, was required to accept, with no tolerance, every standard gauge. The cams were then stoned and the bolt runway polished before barrel and receiver were assembled.

The stocking followed, and every care was taken to see that each rifle rested so that all bearing was eliminated. The stocks used were selected straight-grain balks—not the curly grain which makes for beauty—and weakness—in *de luxe* weapons. Before being assembled with barrel and receiver, the stock was soaked five times in linseed oil, to drive all moisture from it. This soaking is responsible for the dark color of the rifles.

After the rifles were assembled, they were taken out and targeted, not in a Mann rest but in a muzzle and elbow rest, fifty or sixty shots being fired from each rifle at 200 yards. If the rifle would not group within 4 inches vertical and 8 inches horizontal, it was rejected as being not good enough for National Match use.

"OUR RIFLES"

By CHARLES WINTHROP SAWYER

(Firearms Consulting Engineer of
30 years' experience)

THIS BOOK is a result of long and extensive study by a recognized authority. It is NOT a compilation of inaccurate free gunstore catalogues with which the market is flooded at the present time.

Its presentation of data is rich with the lure and the lore of arms, it gives zest to range instruction and turns work to pleasure. Rifles and carbines for the past one hundred and twenty years, their velocity, accuracy and comparative worth, how best to use the modern ones, how they are made, how to repair them, the very different arms that we shall have in the near future; "OUR RIFLES" is your easiest and best arms instructor.

12 mo., about 400 pages, profusely illustrated \$3.60 postpaid. Deluxe edition, red limp leather, \$6.10 postpaid.

For sale at all bookstores or by the publishers.

THE CORNHILL COMPANY

2A Park Street

Boston, Mass.

This standard was fixed arbitrarily, recognizing no ammunition errors.

As they stand, the National Match rifles are perhaps the most carefully made of any military rifles ever turned out.

The ammunition, made under the direction of Captain Wallace L. Clay, has proved to be exceptionally accurate. It carries a 170-grain bullet, square based, propelled by 50.1 grains of Dupont 17½ powder. The powder is the progressive, decopperizing type. The explosion of the cartridge generates a pressure of only 42,000 pounds to the square inch, and gives the bullet a muzzle velocity of 2,600 feet. The recoil is only slightly heavier than that of the ordinary 150-grain-bullet cartridge.

"COMMERCIAL ROW" DRAWS THE RIFLEMEN

Camp Perry, Ohio, August 15.

(Special Correspondence to *Arms and the Man*.)

THEY are all here—the old familiar faces of Commercial Row—the men to whose tents the shooters naturally gravitate after dark to hold long pow-wows over guns and ammunition, just as they have always done since the inception of the National Matches.

Commercial Row is an institution which should never be permitted to die. In the tents of the arms and ammunition companies there is more useful information disseminated and more friendships sealed than in any other part of the National Match range. There the tyro gleans hints from the old-timer; there the newcomer becomes acquainted with the latest in shooting equipment; there much of the real interest in the National Matches is fostered through shooter meeting shooter and gaining the benefit of new ideas.

Commercial Row this year is a long line of tents on the right-hand side of the main road as the shooter enters camp. All of the tents are uniform, and in front of each is a sign with the name of the company occupying it. Long after all the rest of the camp has succumbed to darkness and quiet, Commercial Row is lighted, and in every tent can be found little knots of shooters "chewing the fat" over the day's matches or discussing the latest development in rifles and ammunition.

At either end of the row, the incoming teams found good boosters of the shooting game—Major J. J. Dooley and Paddy O'Hare.

Paddy's tent was the first in the row coming up from the station. It proved during the matches to be as popular a hang-out as ever. Paddy says that he's planning a trip overseas directly after the matches to find out what the 1920 styles in shooting bags are at Bisley.

Jack Dooley has his hands full this trip. His tent is the headquarters not only for the Savage line, but for the products of the Stevens Company as well, since the amalgamation of those two concerns. In addition, Major Dooley is looking after the interests of the U. S. Cartridge Company, the home of the 180-grain Palma. Along with him he brought W. D. Higgins, formerly a well-known trapshot with the U. S. Cartridge Company, but now with Savage, and Marine Gunner J. L. Renew, U. S. M. C. R., who has made some little small-bore history with .22-calibre rifles.

There are some new faces in the Western tent, where R. F. Riggs, of the ballistic department; J. E. Griffin and H. L. Maitland, of the Sales Department, are holding the fort. They are rapidly becoming acquainted with the shooters, however, for they have something in their bag of tricks which would naturally arouse any shooter's curiosity—an anti-metal-fouling bullet.

Representing the Hercules Powder Company are C. S. Landis, H. H. Champney, Henry Marsh and L. C. Weldin. Landis has been in the shooting game as a civilian rifleman for several years, and the other boys are well versed in the powder-making end of the work.

Captain A. H. Hardy, the Denver marksman, who will take his trusty six-shooter or rifle and drill out a silhouette picture with bullets, who can hit 'em in the air or on the ground, high, wide and handsome, is on hand to represent the Peters Cartridge Company. Captain Hardy brought no assistants with him. His tent-mate is his 13-year-old son, Howard.

Any shooter setting out to find the DuPont outfit among the tents of Commercial Row has a hard time, for the simple reason that DuPont has no tent on the main street; yet there are perhaps more DuPont men in camp than from any other munitions company. In all, the DuPont representatives in camp number nearly a score, for in addition to Major K. K. V. Casey, E. R. Galvin,

World's Champions Shoot HERCULES POWDERS

The American Olympic Rifle Team won the World's Championship in the Military Rifle Team Match at 300 and 600 meters with a score of 573 out of 600; the 300 meters Team Match with 289 out of 300 and the Free Rifle Team Match with a score of 4873. Commander C. T. Osburn won the Offhand Championship at 300 meters with a score of 56 out of 60.

The American Olympic Pistol Team won the 50 meters Pistol Team Match with a score of 2374 out of 3000 and the 30 meters Team Match with 1309 out of 1500. Karl Frederick won the Individual Championship at 50 meters with 496 out of 600. DaCosta of Brazil, was second with 489, followed by Lane with 482. Paranex of Brazil, with 274 out of 300, Bracken with 272, and Frederick with 266, won the high three places in the 30 meters Individual Pistol Championship.

Hercules Powders were used by the Individual Rifle and Pistol Champions, by each member of the American Rifle Team and the American, Brazilian and French pistol and Revolver Teams.

HERCULES POWDER CO.

Wilmington

1005 Orange Street

Delaware

W. W. Terrill and T. G. Samworth, all of the DuPont shooter salesmen were ordered to Perry for the purpose of helping out at the trapshooting layout, and also to receive instruction in rifle and pistol shooting.

Major Casey and "Big Bill" Terrill are to be found in the camp of the Delaware Civilian Rifle Team, of which Terrill is the captain. Mr. Galvin spends most of his time at or near the battery of traps, which were erected down by the clubhouse, while Tom Samworth is in charge of the statistical office of the National Matches.

It is the DuPont policy to get the shooter-salesmen together once a year for conference. This year Camp Perry seemed the ideal place for the meeting, since the representatives of the DuPont Company not only could do good work in instructing the competitors in clay-bird smashing but would have an opportunity of acquiring training in rifle and pistol practice not ordinarily available.

The Remington Arms Company sent Frank J. Kahrs and a corps of able assistants to look after Red Ball interests on Commercial Row. With Frank are Larry Cumberland, John S. Cole, Jr., Everett Preece and Captain C. J. Van Amburgh.

Anybody dropping into the Winchester tent will be under no doubt that he is at a National Match. If "Cap" Richard doesn't greet you, "Cap" Laudensack will, and if you look well into the corners of the tent, you may discover old-timer George Chesley; but George most of the time is down on the small-bore range along with Virgil Richard. There is hardly a shooter in camp—except, perhaps, some of the very new ones, who is not known to some one of the Winchester crew.

A new firm on Commercial Row is housed in the tent which bears the "B. S. A." emblem. Frederic Robertson, the American representative of the British firm, heads the delegation, while Captain E. Newitt, a veteran of the small-bore game as it is

played on the other side of the pond, and L. J. Corsa, of New York City, an experienced shot with the .22, are taking care of the practical side of the work of introducing their match rifles and range equipment to the shooters here.

The Smith and Wesson representatives are headed by Major Roy D. Jones, himself an enthusiastic shot, and the man who did much toward supplying those of the Olympic Pistol and Revolver Team, who used his brand of arms with as good target pistols as could be obtained. It is said that about the time Jack Dooley was shelling the woods to get special rifles for the Olympic riflemen, Major Jones was engaged in a similar pursuit in respect to certain pistols which were desired. That the very best barrels he knew about were in the possession of a dozen pistol shots of the Springfield Club, and that to pry a hand-gun enthusiast loose from an A-1 tube is about the hardest task a man could set himself, did not deter Major Jones. How he got the barrels hasn't been told; but he did get them, and they were every one absolutely accurate. With Major Jones is C. R. Bower, and later Victor Wesson, of the firm, dropped in.

The man who discovered at the last moment that the trigger pull on his pet hand-gun had gotten out of kilter or that some other important part of his smoke-wagon had gotten out of gear, found ready relief in the Colt tent, where A. C. Hurlburt, B. A. Bower and J. H. Fitzgerald held forth. There is hardly a hand-gun expert who does not know, personally or through correspondence, "A. C." and "Fitz." "A. C." has been prominently identified with the U. S. R. A. and the hand-gun game for many years. There are rumors that he was around about the time Sam Colt whittled out the first revolver model while before the mast in the fo'c'sle of a windjammer, and that he waited on the dock ready to take the model and introduce it to the gentlemen who had up to that moment, been ventilating one another with primitive pepper-

(Concluded on page 28)

U. S. Ammunition at

U. S. Ammunition—the choice of experts—won more prizes in the service rifle, small-bore and pistol competitions at Camp Perry, Ohio, than all other makes combined, living up to its slogan

HITS WHERE YOU AIM

Users of the U. S. 180-grain Palma and U. S. .22 calibre N. R. A. cartridges are to be found on every prize list for "the shots that hit are the shots that count."

.22 Caliber N. R. A. Cartridges

were the premier small-bore ammunition at Camp Perry where the Small-Bore National Matches have just been concluded.

From first to last, they were the favored of discriminating shots.

In the winning of the International Small-Bore Match for the Dewar Trophy, the two high men used U. S. N. R. A. cartridges. All other makes of commercial ammunition were used by only 8 of the 20 shooting members.

U. S. .22 N. R. A. Ammunition took 6 of the 9 prizes in the Small-bore Grand Aggregate;

Five of the 10 prizes in the Off-Hand Sweepstakes at 50 yards;

The first 4 prizes and 5 of the first 9 prizes in the Small-Bore Long Range Re-entry Match;

Half of the prizes in the Small-Bore Marine Corps Match;

Half of the prizes in the Small-Bore Wimbledon Match;

A large percentage of the prizes in the Small-Bore National Individual Match;

Half of the top places in the 100-yard Sweepstakes.

THE UNITED STATES

111 BROADWAY

the National Matches

U. S. .22 N. R. A. Cartridges are especially adapted to the making of top scores with super-accurate target pistols, and the hand-gun competitions at Camp Perry give ample proof of their reliability.

Their superiority over all other makes was undeniably demonstrated in the results of every competition where target pistols were permitted.

In the Individual Slow Fire Re-Entry Match, out of ten medal winners, 8 places were won with U. S. .22 N. R. A. cartridges. All other commercial makes won two places. In the money prizes in this event, 23 of 30 prize winners, used U. S. All other commercial makes won 7 places.

In the Individual Slow Fire Single Entry Match, the first prize with a score of 100, second, third and fourth places, and nearly all of the remainder of the 30 prizes were won with U. S. .22 N. R. A. cartridges.

180-GRAIN PALMA

Early this year, the United States Cartridge Company decided against making up any special match ammunition because its factory was already running to capacity with commercial business.

Hundreds of riflemen who know the precision and accuracy which may be confidently expected from the famous 180-grain Palma, insisted that a supply be available for the National Matches.

It was impossible to meet the full demand, but those whom we were able to supply, found that their faith in U. S. 180-grain Palma was justified.

In the Grand Aggregate Match—total of the scores in the Wimbledon, Leech, Marine Corps, Members' and President's Matches, the supreme test of consistent performance—the winner, and 5 of the first 8 prizes winners used U. S. 180-grain Palma.

In the Members Match, the winning score of 50 with 9 additional bull's-eyes, and the scores in 5 of the 6 first places were made with U. S. 180-grain Palma.

In the Leech Cup Match, the winning score of a possible at each range and 11 additional bull's-eyes, as well as the scores in 3 of the first places, were made with U. S. 180-grain Palma.

In the President's Match, 9 of the first 12 prizes winners, and 46 of those who finished in "The President's Hundred" used U. S. 180-grain Palma. The greater number of the remaining places in this select coterie of marksmen were won with government ammunition.

In the Marine Corps Cup Match, the winner, and 6 of the first 8 prize winners used U. S. 180-grain Palma.

CARTRIDGE COMPANY

NEW YORK CITY

Records Broken at Perry

(Continued from page 6)

SHOOTING against one another, two of the best rapid-fire shots at the National Matches competed for first honors in the Rapid-Fire Match, which follows the first stage of the National Match course, on August 13. The event attracted more than 500 competitors, of whom sixteen tied for first place on perfect scores, and thirty one for second place on scores of 99.

The shoot-off for first place left Lieutenant V. L. James, of the Infantry, and Lieutenant F. S. Ross, of the Infantry, the latter known down where he has been doing border duty as "Poncho" Ross, still neck and neck for first honors. Ross is one of the most promising of the younger shots in the Infantry, and James showed himself capable of making good scores time and time again during the match period. When Ross and James began their shoot-off there was a 25-mile wind blowing from 10 o'clock. *The first string of the shoot-off was from the sitting position. Both cracked out possibles. The second string was from the kneeling position. Again each put all of his shots into the black. The third string was shot from a return to the sitting position, and still neither had anything on the other. At the end of still another string they ran neck and neck. It was not until the fifth shoot-off that Ross dropped one of his one-eighth inch outside of the black and lost first place to his friend.*

TWO team matches—the Enlisted Men's and the Civilian Interclub—the former one of the most important events from the service viewpoint and the latter one of the most hotly contested among civilian clubs—intervened between the Rapid-fire Match and the Marine Corps Cup event at this point of the program.

Thirty-three teams from the different branches of the service, including the Infantry, Cavalry, Marine Corps, Philippine Scouts and National Guard units, entered this event, the winning of which is regarded as no small honor, since only enlisted men can compete, and by the scores in this match the skill of the rank and file of the different branches may be measured.

Over the course, which calls for six-men teams, shooting ten shots for record, rapid fire, kneeling or sitting from standing, at 200 yards, and ten shots for record at 600 yards—a team possible of 600—the U. S. M. C. team No. 3 scored 589 points, an individual average of more than 98 per cent.

In the Civilian Interclub Match thirty-nine entries were made. The course of fire in this event calls for four-men teams, over the same course as in the Enlisted Men's Match.

The National Capital Rifle Club, of Washington, D. C., out-shot all competitors in this event, scoring 383 points out of a team possible of 400, an individual average of 95.75 per cent.

AN OLD-TIMER among the shots in the Marine Corps, Marine Gunner J. J. Andrews, whose last appearance on the list of major prize winners was at Jacksonville in 1916, when he carried off the Wimbledon Cup on a score of 99, captured that prize which is most coveted by the Soldiers of the Sea—the Marine Corps Cup.

The high score among 738 entries, shooting twenty shots for record at 600 and 1,000 yards, is the requirement for honors in this match. During the first stage the shooting conditions were, relatively speaking, good; corrections for wind ran from about zero to three-fourths point left. In that stage many of the contestants rolled up nearly perfect scores, there being two scores of 99 and several 98. During this part of the match Andrews made only a fair score—97.

Shooting conditions were very different at the 1,000-yard range, however, Andrews' windage corrections running three points each way, yet he managed to put over a total of 98, while most of the boys with the high totals in the first stage of the match could do no better than 96 or 97. Sergeant T. B. Crawley, of the Marine Corps, was Andrews' most dangerous competitor. He, too, scored a total of 195, but his high score was at the shorter range. So, outranked, he was forced into second place.

TWO more team matches—the Championship Regimental, for the Rumbold Trophy, and the Port Clinton, for the cup presented this year by the business men of that community—followed the Marine Corps.

The Regimental Championship was decided on August 16, when twenty-three regimental teams went to the firing line to shoot ten shots rapid fire, kneeling or sitting from standing, and ten shots for record at 600 yards. Pitted against teams from the Infantry, from R. O. T. C. units and from several National Guard outfits, the First Philippine Infantry proved its superiority in this contest by hanging up a team score of 572 out of 600, 7 points better than its nearest competitor.

About the same time these two-team events were being decided, the R. O. T. C. Match—fifteen shots for record at 1,000 yards—was staged. Eleven of the R. O. T. C. units entered, and the competition was keen, the student officers from the different camps having taken strongly to rifle shooting. The score of the winner—the Camp Devens, Mass., Team No. 1, with 375 points—was only 1 point higher than the team in third place.

The Port Clinton Trophy Match, open only to teams from civilian clubs, was fired on August 16. There were twenty-six entries. The same course of fire as that in the Regimental Match was followed by the six-man teams. The Arizona Civilian Team won the competition on a score of 579 out of 600.

IT HAS been many years since more enthusiasm has been aroused over any one event than that which preceded the shooting of the 1920 Wimbledon.

Previous winnings at this meeting with telescope sights, together with generally high scores in practically every event, resulted in a generally accepted belief that for once the historic competition, which has somehow, through the many years of its existence, defied the perfect score, would be won by a possible.

The Wimbledon has always stood for "any rifles and any ammunition," and many times in the past special rifles have been used; but not to so great an extent as might have been expected. But this year, the absolutely open conditions of the match meant something; every man on the ground who believed in the efficacy of glass sights over iron set about attempting to prove his theory. In addition, special rifles of every description—principally, however, Springfields equipped with 'scopes, sporting Springfields and heavy pressure-barrel artillery—appeared along the line. Yet, as usual, the Wimbledon, in which the unexpected is almost sure to happen, proved to be equipped this year with a very businesslike sting in its tail for the "glass-eye" and the special-gun boys.

The pressure-barrel guns attracted considerable attention this year. It will be remembered that this particular type of shoulder cannon made its appearance at Caldwell in 1919, aroused much curiosity, but was shot by only one competitor in one match and did not make the winning score.

There were no less than four of the big pressure-barrel rifles on the range at the opening of the Wimbledon, each equipped with a telescope sight. The men shooting them included Hoffman, Mullaly, Lloyd and Captain H. L. Smith, of the Marine Corps; Vaptain Van Amburgh, Captain Crossman and Captain Wotkyns, of the Small-Arms Firing School. Much was expected of these rifles in the way of accuracy, and many of those who were not able to connect with one for the event felt themselves outclassed at the start in the way of equipment. But the match itself had a different story to tell.

When the hour for the match arrived on August 17, it was apparent to all that it was a "glass-eye day" if ever there was one. The first relay shot in a calm drizzle. The wind flags and the danger flags drooped lifelessly from their staffs. The light was poor. Those who were called first to the firing line found the question at that time to be one purely of vision. When a shooter once got into the bull, at that stage of the game, he stuck there; the only trouble was that "getting in" was difficult and likely to cost precious points. The drizzle, however, stopped about the time the first relay finished, and with slightly better light, there came a promise of improved shooting conditions.

W. R. Stokes, of the District of Columbia Civilians, shooting on target 23 in the second relay, put in two 4's for sighting shots and then connected with the bull's-eye. For twenty shots he sent them across for 5's, and word passed rapidly down the line that the Wimbledon jinx had been broken and a possible made, while Stokes prepared to continue shooting for record. Stokes' twenty-first shot was rewarded also with a white marker, and then he discovered that he had exhausted his ammunition. He obtained a new box with little delay, but apparently he picked for his first shot a cartridge which didn't have a bull's-eye in it, and the marker down at the targets showed a 3.

Nevertheless, Stokes had hung up a record and put up a score for those who followed him to shoot at—he was the first man to make a possible in the Wimbledon.

By the time the third relay was on the line the light conditions had very materially grown better, and there was still an almost total absence of wind. It was still "glass-eye" weather, however, and when Captain Van Amburgh lay down with his pressure barrel, he started off well. He got into the black easily and put over a string of thirteen straight bull's-eyes. Then he pulled a close 4. Although the shot was challenged, the challenge was not sustained, and Van Amburgh's chance for tying or bettering Stokes' score was gone. The Captain did, however, put over a string of six more bull's-eyes and finished up with a 99.

As the shooting continued, the light grew steadily better, sunshine which was not too bright following the breaking of the clouds, and down the line several hundred riflemen battled to break the record set so early in the game. Just after Van Amburgh shot, Captain Crossman went up with his pressure-barrel and made it behave through a string of seventeen 5's, finishing also with a 99. The best Wotkyns could find in his box of cartridges, in spite of his heavy barrel, was 97. The Marine Corps shots who used the big rifles were unable to equal these scores, Mullaly scoring only 96, while Hoffman, Lloyd and H. L. Smith were also out of luck.

John Hession, defender of the Wimbledon, went up shortly after 10 o'clock. His work last year, together with the runs he made during the early matches of this meeting, drew several spectators, who anticipated another record run. But Hession went out for a 4 on his first record shot, challenged, lost the decision, and finished up five down.

Meanwhile good average scores for Wimbledon shooting were being made down the entire firing line, especially by those using 'scopes, but none of the long-range sharks seemed to be making much headway toward lowering Stokes' record. So sure was everybody that the match had already been won, or that at least it would take a special rifle and special sights to put Stokes in second place, that the iron-sight "as issued" contingent was entirely overlooked.

Shortly before noon, however, Lieutenant L. A. Yancy, U. S. N., went up. He was shooting one of the National Match Springfields with commercial match ammunition. The light was good, and Yancy had no difficulty in getting into the black. He sent over twenty straight, making the second possible within a few hours in the Wimbledon, after the record score of one point down had stood for more than a generation. Like Stokes, Yancy got in his twenty-first shot, but his twenty-second landed him only a 4. This, however, was sufficient to outrank the score of the District of Columbia shot.

Shooters during the afternoon found vastly different conditions than those which obtained in the morning. Rapidly changing light and shadow over the targets, accompanied by a pestiferous fishtail, that stiffened the wind flags with its 25-mile velocity, was a very potent discouragement to good scores. Many of the old shooters, who have been in the game for the past twenty years, gave up in disgust.

There was not a chance during the entire afternoon for a shooter—no matter how skilled or how good his equipment—to go the record-breakers of the morning one better, or even to come within tying distance.

WITH a score which broke all Palma world's records, the Herrick Trophy was won by the Massachusetts Civilian Team No. 1. The Herrick is one of the classics of the Ohio State Rifle Association Program; it was fired this year under N. R. A. supervision. It follows the Palma course of fire, calling for two sighting shots and fifteen shots for record at 800, 900 and 1,000 yards. It is one of the supreme tests of long-range shooting.

Forty-eight teams, each anxious to win the distinction of being victorious in the Herrick, including the pick of the service contingent as well as the National Guard and civilian outfits, went on the firing line.

The 800-yard stage of the match presented no very especial difficulties to the experienced riflemen competing. The light was bright, and the wind easy to compensate. Marine Corps Team No. 3 took the lead and held it through this part of the shooting, finishing at the top with 593 points to its credit, with the Massachusetts boys second on a score of 589.

The 900-yard stage of the match was shot under conditions which were far from ideal. The same troublesome gale that marred the last hours of the Wimbledon, kicked in off Lake Erie and romped spasmodically across the range, to the discomfiture of many of the contestants. At the close of this stage the Massachusetts Civilians had closed the gap between its score and that of the Marines' third team and added a few points to the good, with a total of 1,165.

The 1,000-yard stage brought the real test of skill. Rapidly changing light in the face of a coming shower and sufficient wind to call for skill in estimating corrections accompanied the shooting.

Fairly early in the game it became apparent that the final struggle would not be between the Massachusetts boys and the Third Marines, for this particular team of Leathernecks got over the long range with no better than 560 points, while Marine Corps Team No. 4 cracked out a total of 571. The Massachusetts team, however, managed to hand up a 1,000-yard total of 570, one point below that of the Leathernecks, and this, with their excellent scores made at the shorter ranges, gave them the victory.

A RECORD score of but 4 down over three hard ranges won the President's Match and the Cavalry Cup, awarded in the same event, for Lieutenant Michael Fody, U. S. A.

The 200- and the 600-yard stages of the competition were shot August 18 under fairly favorable conditions. The wind, although strong, was steady, and 1½ points on the wind-gauge sufficed to make the necessary correction to get into the black when heavy 180-grain match ammunition was used. Because of this, the competition during its early hours was keen and close, and at the conclusion of the first day's shooting Fody led the field on Creedmoor count instead of points, R. C. Cotton, of the Minnesota Civilians, tying his total of 198 out of 200. In third place was F. H. Kean, of the Massachusetts Team. Fody's group at 600 yards was crowded into the size of a spotter at 9 o'clock, with one close 9 just outside the ring. In the President's Hundred, at that point in the shooting, were all who had made scores of 192.

A 3½-point wind, a little off 3 o'clock, held over the range when the 1,000-yard stage of the match began on August 19. Fody came up in one of the earlier relays. He lay down, put on 3½ points of right wind and never made a change in his sight setting throughout his string, finishing 2 points down on the long range—a total of 296.

Along the line during the morning several scores of 98, and a few of 99 were made, and these scores brought Lloyd, Mullaly, Andrews, Nordstrom and Humphrey, of the Marines, and Vereer, of the Infantry, high up on the list. But their strings at the earlier stages were not sufficiently high to edge Fody out of first place.

Lieutenant Fody, in taking the President's, won his first big match. He is not a newcomer in the rifle game, however. In 1913 he shot with the Northwest Rifle Team against Canada. In 1916 he led the President's Match through the first two stages.

TRADE MARK

WIMBLEDON

The historic Wimbledon Cup Match, the blue ribbon match, won by Lieut. Lewis A. Yancy, U. S. Navy, with Remington ammunition, made a new record of 100 possible and one extra Bull's-eye. Chan berlain, of Michigan, fifth with 99, both shooting

OTHER

The President's Match

Lieut. Michael Foddy, Thirteenth Cavalry, U. S. Army, won the President's Match and established a new record with Remington Palma 180-grain, .30 calibre Springfield cartridges, scoring 5 x 300. Lieut. Foddy hit the 4-inch spotter 9 x 20 shots at 600 yards. His mean vertical deviation was two inches.

Herrick Trophy Match

With a new record score of 1735 x 1800 for a team of eight men shooting 15 shots each at 800, 900 and 1,000 yards, the Massachusetts Civilian Team won the Herrick Trophy, shooting Remington ammunition under Palma Match conditions.

Adjutant General's Cup

John W. Hession, New York, won the Adjutant General's Cup with a perfect score and 21 Bull's-eyes. Hession shot 31 consecutive Bull's-eyes with Remington Palma 180-grain, .30 calibre Springfield cartridges.

Governor's Cup

Capt. C. J. Van Amburg, shot the Governor's Cup with a perfect score and 21 Bull's-eyes with Remington Palma 180-grain, .30 calibre Springfield cartridges.

Records Broken at Perry

(Continued from page 15)

CLOSING days of the N. R. A. program were devoted to the Adjutant Generals' Match, the Offhand Match, the Camp Perry Instructors' Trophy Match and the All-Around Championship.

Four entries were listed from among the Adjutant-Generals in camp for honors in the first of these events. This was shot on August 18, under fair shooting conditions, the course calling for a string of rapid fire at 200 yards and a string of slow fire at 600 yards.

Major R. D. LaGarde, Adjutant General of the District of Columbia, and Adjutant General J. J. Borree, of California, set the running, and the Pacific Coast marksman was well in the lead at the close of the rapid-fire stage. He dropped 7 points at slow fire, however, while Major LaGarde dropped only 1.

The Offhand Match attracted more than 200 entries from among the riflemen, many of whom hope to see a return to matches shot in the standing position. It called for two sighting shots and twenty shots for record at 200 yards. As it turned out, this event was run off under conditions which called for a maximum of skill, the wind being particularly disturbing to the man trying to put all his bullets across for 5's.

W. R. Stokes, of the District of Columbia Civilians, shot during the first part of the match and ran up the highly creditable score, conditions considered, of 92. He was nosed into second place, in much the same manner as he was in the Wimbledon, by a contestant who shot on a later relay—R. F. Leighton, of the Montana Civilian Team.

The Camp Perry Trophy Match, instituted this year by the Camp Perry Instructors' Association, called for the first stage of the National Individual Rifle Match and the first stage of the National Individual Pistol Match. During the rifle stage W. H. Spencer, of the Missouri Civilians, hung up a possible score, which was tied by Captain Miller of the Infantry. In the pistol shooting, however, Spencer proved himself superior by 1 point, winning the match.

The All-Around Championship, decided on the scores made in the Wimbledon and the Offhand matches of the rifle program; Match I on the small-bore—re-entry at 100 yards; the total score at 100 clay birds, 16 yards rise; and one half the total score in the N. R. A. Individual Pistol Match. On a score of 502, G. S. Hall, of the California Civilians, won the event.

The detailed scores and the prize awards in the N. R. A. Matches are:

MEMBERS MATCH—600 YARDS.

Savage and Stevens Rifles Helped Win the Dewar Match

The Savage Rifles used were the .22 Calibre Bolt-Action N. R. A.

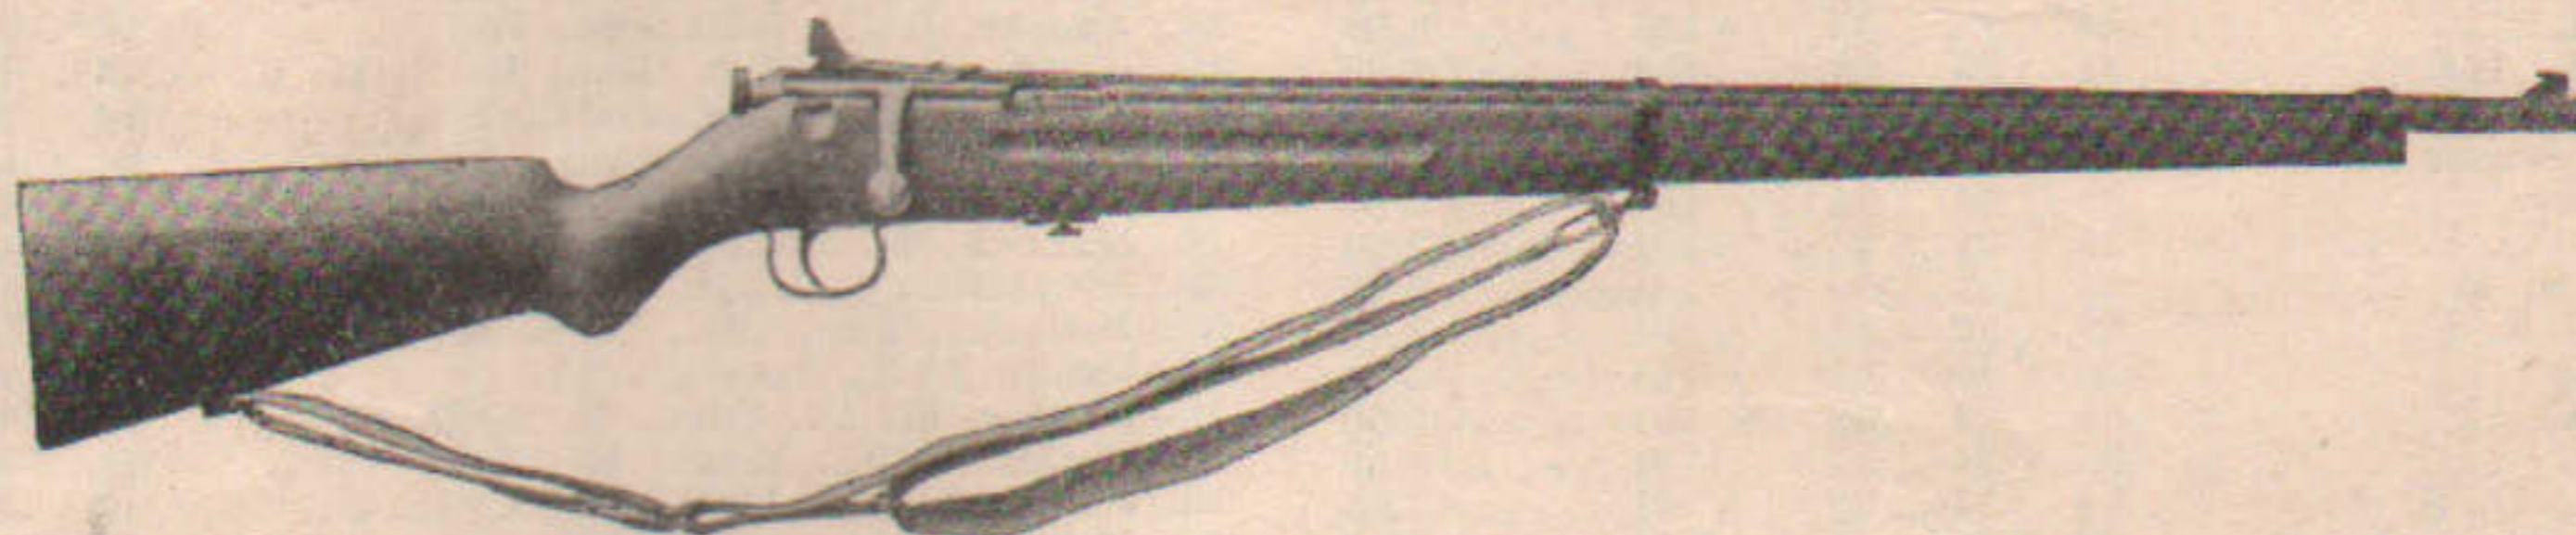

The Stevens were the No. 414 Armory Model Target Rifles.

If these rifles had not been accurate and dependable, they would not have been used in this competition.

THE STEVENS No. 414

Has made and broken more records than any rifle on the market.
It is the ideal target weapon.

THE SAVAGE N. R. A. BOLT ACTION RIFLE

Is the only American made weapon of this calibre with sights meeting the requirements of the official score book for .22. calibre out-doors shooting. It functions like the Springfield Rifle and combines the qualities required for target shooting and for military practice.

Commercial Row Draws Riflemen

(Concluded from page 11)

boxes. But it doesn't pay to believe all you hear at a National Match. "Fitz" has given first aid to many a balky smoke-wagon and is a wizard with a whetstone on a draggy sear. Fitz was unusually happy during the matches. He says that everything is all right now; he can get all of his tools into three arms chests.

Very near to the house which in former years was sacred to a certain big military supply house of the Middle West, the house flag of Sigmund Eisner, of New York, is flying, with Frank Winch in charge. Frank did much to make possible the N. R. A. shooting clothes which have become very popular among civilian shooters. Mrs. Winch is with him, and between the two of them they have been able to supply the sartorial needs of many of the civilian riflemen.

GAIN A FIRMER "HOLD"—
DEVELOP THE "STAHARA"

Marksmen who depend on strength of arm alone when shooting from the kneeling or sitting position, overlook their greatest asset—the muscular strength of the STAHARA or lower abdomen.

How to co-ordinate this strength with that of the arms and legs is told in

"The Secrets of Jiu-jitsu"

by Captain Allan Smith, instructor in hand-to-hand fighting at Camp Benning. Captain Smith demonstrated his system at the National Matches, Camp Perry.

Write today for particulars of this system.

Small-Bore Rifleman's Dope and Score Book

By MAJOR TOWNSEND WHELEN

General Staff, U. S. A.

Chairman Small-Bore Committee, N. R. A.

Contains score sheets suitable for all forms of small-bore shooting, so that riflemen can keep all their scores and records as to sight adjustment and weather under one convenient cover. The book also contains all the practical information necessary for expert shooting with any of the more popular or suitable small-bore rifles, and is based on actual firing by Major Whelen, and *not* on usual information as to ballistics, hence is *practical* and *reliable*.

THE O'HARE MICROMETER

Made for the Springfield Rifle, Model 1903. This micrometer has all others beaten a dozen ways; first—*it's made in America.*

I am pleased to make the announcement I am handling the most Famous Lord Bury Telescope. During the war, I was unable to secure them.

There are one hundred articles that the American Rifleman requires on the rifle range that I handle at very reasonable prices.

MARBLE'S Cleaning Implements Keep Your Gun Right

The clean gun is a sure gun—one that will last for years. **Marble's Cleaning Implements** are needed by every gun owner—the best insurance against destruction by rust and corrosion he can buy. Most dealers have **Marble's Equipment**—if you can't get what you want, order direct. Send for the Marble's catalog.

Marble's Line also includes Safety Pocket and Camp Axes, Cleaning Rods, Hunting Knives, Gun Sights, Waterproof Match Box, Compasses, Fish Gaff, Auxiliary Cartridges, Shell Extractors and Recoil Pads.

Rifle Cleaner

Thoroughly cleans without injuring the finest rifle and removes all lead, rust or powder residue. Made of sections of softest brass gauze washers, on a spirally bent spring, tempered-steel wire—may be attached to any standard rod. **55c.** State caliber wanted.

Anti-Rust Ropes

When saturated with oil they prevent rusting or pitting—perfect protection for any gun. One oiling lasts for years. For shotguns or rifles, **55c.**; for revolvers, **25c.** State gauge or caliber wanted.

Jointed Rifle Rod

The best general purpose rod, for it can be packed in a small space and when screwed together it's as solid as a one-piece rod—can't wobble, bend or break. Three brass sections, with two steel joints, steel swivel at its end. May be had in brass or steel, 26, 30 and 34 inches long, **\$1.10.** Give calibre and length desired.

Nitro Solvent Oil

This wonderful oil will keep sportsmen's equipment free from rust—it quickly dissolves the residue of all powders. A perfect lubricant. 2-oz. bottle, **25c.**; 6-oz. can, **55c.** By mail, 10c extra.

Shot Gun Cleaner

Same construction as rifle cleaner. Guaranteed not to injure bore. Exceedingly durable. Will keep your gun clean and prolong its life. **85c.** State gauge wanted.

MARBLE ARMS & MFG. CO., 502 Delta Ave. Gladstone, Mich.

Black Diamond Gun Grease

Keeps your guns looking and shooting like new, 50 cents, postpaid. Send for testimonial letters and circulars.

A New and Better PISTOL POWDER

OUT of the war comes a new Pistol Powder developed from the experience the powder industry gained during those four years. DuPont Pistol Powder No. 5, a nitrocellulose smokeless powder, is so clean burning, easy shooting and accurate that it is a perfect and dependable load for all revolvers and automatic pistols. It ranks with other DuPont Powders which for 118 years have stood the test of government use, a fact which proclaims their worth.

Lad Makes Record at National Matches

IN THE Small-Bore 100 yard Sweepstakes event at the National Matches at Camp Perry, VIRGIL RICHARD on August 9th made the first 100 yard "possible" scored in the Small-Bore events at the National Matches. In all the matches at the Caldwell competitions last year not a single "possible" was scored over this distance. The score required the placing of ten shots in the two-inch bull.

Richard is the 19 year old lad who shot what is believed to have been the first "possible" ever made in America with the small-bore rifle in open outdoor competition over the 100 yard range when he made this perfect score at Tenafly, New Jersey, July 5.

IN BOTH EVENTS YOUNG RICHARD
